

# Count and Recycle

**Counting • Classifying**

**• Caring for the Environment**

Read aloud environmental-awareness books such as *Save Our Planet: 52 Easy Things Kids Can Do Now* by Susan A. Levine. Have students brainstorm ways to help the environment. Ask the class to collect 100 recyclable items, such as aluminum cans, plastic containers, and glass bottles. Invite students to sort the items and place them in labeled boxes. Recruit a parent volunteer to deliver the items to a recycling center and handle the proceeds. Donate the money to charity or use it for the 100th-Day celebration.
