## Fact Families

★ When addition and subtraction problems contain the exact same numbers, they are a family.

Fact Family:  $2+1=3$     $1+2=3$     $3-1=2$     $3-2=1$

Complete the fact families.

1  $3+2=5$

$2+3=$  \_\_\_\_\_

\_\_\_\_\_  $-3=2$

$5-$  \_\_\_\_\_  $=3$

2  $3+3=$  \_\_\_\_\_

$6-3=$  \_\_\_\_\_

3  $5+2=7$

\_\_\_\_\_  $+5=7$

$7-2=$  \_\_\_\_\_

$7-$  \_\_\_\_\_  $=2$

4  $2+0=$  \_\_\_\_\_

$0+$  \_\_\_\_\_  $=2$

$2-0=$  \_\_\_\_\_

$2-$  \_\_\_\_\_  $=0$

5  $4+$  \_\_\_\_\_  $=9$

$5+4=$  \_\_\_\_\_

$9-$  \_\_\_\_\_  $=5$

\_\_\_\_\_  $-5=4$

6  $3+6=$  \_\_\_\_\_

$6+$  \_\_\_\_\_  $=9$

$9-6=$  \_\_\_\_\_

\_\_\_\_\_  $-3=6$

### Think It Through

Look at item 2 above.  
Write a few words  
telling why there are  
only 2 facts in this  
family instead of 4.

Hint: What would the missing facts be?  
Are they the same as other facts?
