

## Snowflake Center Activity

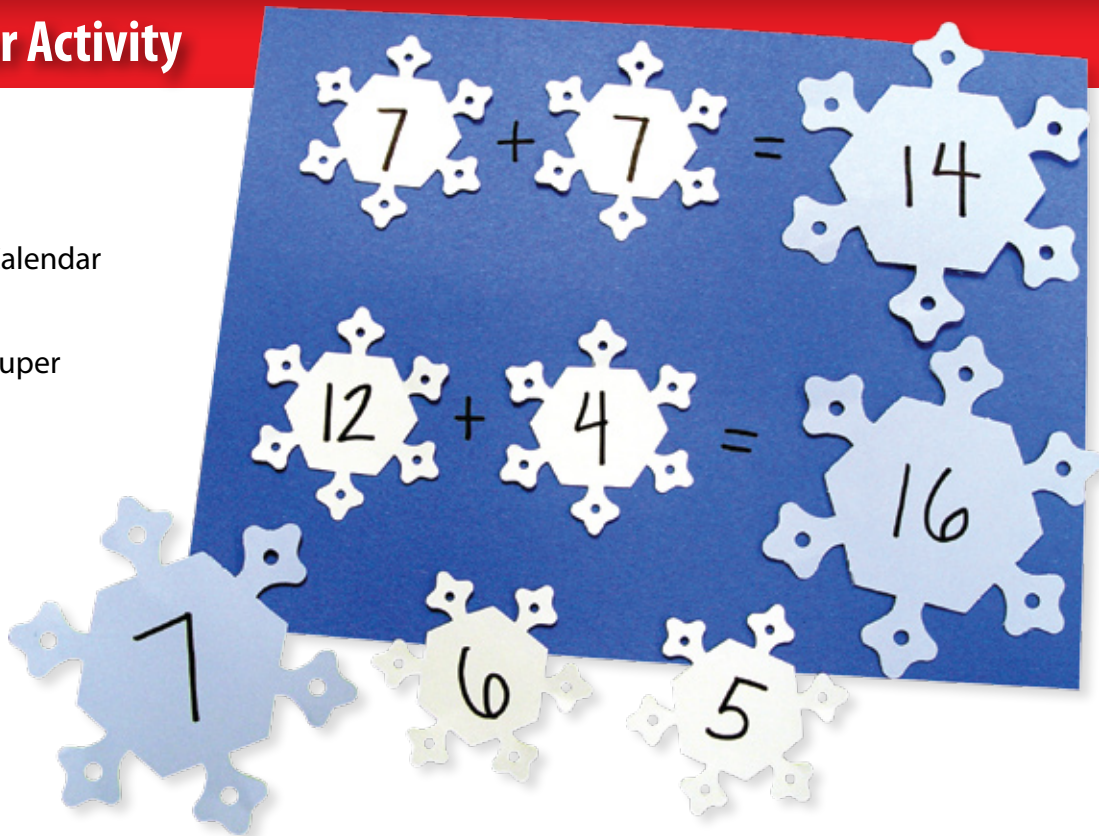

### Materials:

3" Snowflake Two-Color Calendar  
Cut-Outs (CTP 4956)

5" Snowflake Two-Color Super  
Cut-Outs (CTP 4890)

Construction paper

Markers

### Directions:

1. Write a variety of numerals on the 3" Snowflake Two-Color Calendar Cut-Outs.
2. Write sums for the equations on the 5" Snowflake Two-Color Super Cut-Outs.
3. On construction paper write equation symbols that are applicable to your class lesson (the addition equation is illustrated in the photo.)
4. Encourage students to choose the correct numerals to equal the sum.

### Tip:

Grounding math in children's own world can allow for better comprehension and excitement for learning. Show students how math is all around and apparent throughout his/her daily routine such as telling the time school begins, counting crayons, or pouring milk from a gallon at home.
