

Mother's Day Card

Materials:

Month-by-Month Crafts book (CTP 2495)

Duck reproducible (page 86)

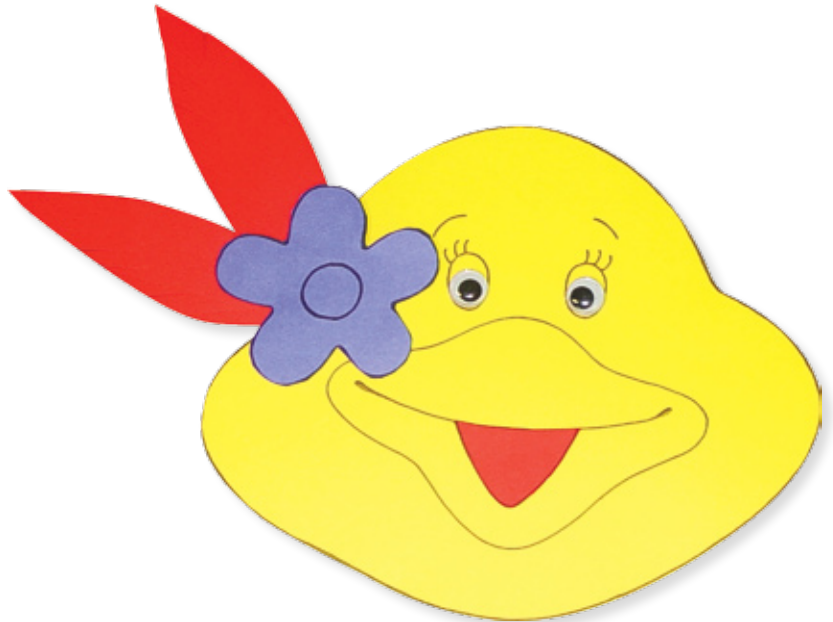

brightly colored construction paper

crayons or markers

glue

white card stock

wiggly eyes

Directions:

1. Copy the duck reproducible on card stock.
2. Have students cut apart the pieces and use them as templates to trace the head, beak, and flower on brightly colored construction paper. Encourage students to decorate the pieces with glitter and paper scraps.
3. On the back of the ducks, have children write a special note to their mothers.

Tip:

Make a sample of the card before you introduce it to the class. This will give you a good idea of how to prepare for the activity and how much help children will need to complete the card.
