

## Sequencing Circles

### Materials:

Literacy Centers book (CTP 3344)

construction paper

glue

markers or pencils

scissors

### Directions:

1. To illustrate the sequencing of the events related to a theme, have students cut progressively larger circles, layer them, write each event on the outside edge of a circle (being careful to write the next event on the next circle), and then glue them in order.
2. Have students use different colors of construction paper for each circle to make this a colorful and vivid presentation.

### Tip:

Invite students to present their projects to the class.
